

The Elegance® Series of wood burning fireplaces by Ambiance® is an outstanding combination of innovative technology and modern personalized aesthetics. They are backed up by the best warranty in the industry.

All four models in the Elegance® Collection, the 36, 40, 42 & the 42 See-Thru models are lined with soapstone and include a patented primary air control system, which means better heat retention, slower burn rate and steady, consistent heat over a longer period. You'll enjoy more heat from less wood!

FLEXIBLE FINANCING

Most Ambiance® Authorized Dealers offer advantageous & flexible financing solutions.

FEATURES

AN EXCEPTIONAL FIRE

The Elegance® series offers an exclusive combination of aesthetics and technology with its four models that now include the first EPA certified see-through fireplace in the world! The Elegance® fireplaces are lined with Soapstone which has no equal for heat management. It absorbs 15 % more heat than firebrick and radiates heat 5 times more than firebrick. This increased efficiency is also the most beautiful to look at inside the firebox. It feels and looks rich!

HEATING COMFORT

The Elegance® series features a unique patented air control system. This is an important detail when it comes to a wood fireplace. It allows you to slow down the fire to as low as 0.8kg per hour. It will extend burntime and generate heat at a more even rate. When choosing a wood fireplace, make sure it truly has this type of control over the fire!

Watch how it works

The Elegance® series provides heat generously!
You may want to take advantage of it by sending heat to other parts of your home.
